

STUDIOTECH's main business is engineering, distribution/sales, installation and after-sales servicing of broadcast and professional audio/video equipment. The company also designs and installs turnkey projects such as recording/mixing studios, editing suites and mobile OB units.

## Vacancy for Broadcast Engineer

Studiotech Belgium is seeking a talented and motivated Broadcast Engineer to join our team at our Brussels office. This role is focused on the integration, installation, and maintenance of broadcasting and professional audio/video systems for our clients. The ideal candidate will have a solid technical background, experience in broadcast technologies, and a keen interest in staying updated with evolving industry standards. Willingness to travel as required.

### Qualifications:

- Applicants should have a degree in Broadcast Engineering, Electronics, Computer Science or equivalent technical qualification
- Minimum two years' experience in the audiovisual or broadcast industry
- Strong technical knowledge of broadcast systems, including video, audio, and IP-based infrastructures
- Experience in integration and commissioning of equipment for production and post-production studios, transmission systems, and OB units
- Familiarity with IP workflows, networking, and broadcast control systems
- Knowledge of satellite, microwave, and IP news gathering technologies is a plus
- Good communication skills and ability to work with clients and colleagues in a collaborative manner
- Bilingual French/English required; intermediate knowledge of Dutch is an advantage

### Duties:

- Installation, configuration, and integration of broadcast and audiovisual equipment
- Provide maintenance and ensure good operational conditions of systems in production
- Support in the design and implementation of workflows adapted to client requirements
- Commissioning of new projects and technical support during operations
- Troubleshooting and resolving technical issues both in the field and at the client's site
- Manage and document project progress and interventions
- Provide training and user support to clients when required

### Profile:

- Proactive and motivated, with a problem-solving mindset
- Responsible, able to take initiative, flexible and punctual
- Comfortable working independently or as part of a team
- Able to manage multiple projects simultaneously
- Available to travel within and outside Europe

### Offer:

- A dynamic and international working environment in an open-minded company culture
- Opportunity to work with cutting-edge broadcast technologies
- Attractive remuneration package commensurate with skills and experience
